

Resources for Respirator Fit Testing for Alameda County

List updated 9/30/2020

Information on Companies providing N95 Fit Testing, Training, and Respirator Medical Evaluations

Cal/OSHA regulations have multiple requirements for occupational respirator use. Readers are encouraged to review 8 CCR 5144 “Respiratory Protection” www.dir.ca.gov/title8/5144.html and 8 CCR 5199 “Aerosol Transmissible Diseases” www.dir.ca.gov/title8/5199.html for additional information.

Three steps are required to ensure that health care workers are properly fit tested and prepared to wear their respirators correctly in compliance with the regulations.

(1) A person using a respirator must complete a **Respirator Medical Evaluation** to verify that they are capable of wearing a respirator without harm.

(2) With a medical evaluation clearance, they may be **Fit Tested** for the type of respirator, by brand, model, and size to verify that the respirators fit them.

(3) The respirator user must be Trained on how to properly place, use, and remove their respirator.

The following companies are available to provide respirator fit testing for healthcare providers in Alameda County. The list includes online resources for training and medical evaluations, as well as companies providing N95 fit testing at your location or at the company’s site. This is not a complete list of all sites providing the services, or all fees, and inclusion on this list should not be construed to represent any type of pre-qualification, review, approval, or endorsement by the Alameda County Public Health Department. They have been listed by alphabetical order.

Healthcare workers who are affiliated with a Hospital, University, or Company employer should contact their Human Resources department for information regarding Fit Testing services they may offer for staff, faculty, and students.
