Re: EMS System Redesign – Process and Executive Committee Representation

Dear Ms. McFadden:

The Alameda County City Managers' Association (ACCMA) supports the mission of the Emergency Medical Services (EMS) System Redesign Committee. Specifically, ACCMA has interest in an EMS service delivery model that is data driven, based on patient outcomes, and includes a well-vetted service delivery costs analysis.

Based on the wide-ranging impacts associated with any potential changes to the EMS model, ACCMA is requesting the following:

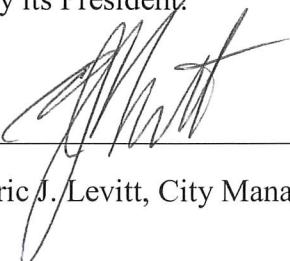

1. Allow adequate time for complete and thorough analysis and reporting by the individual subcommittees assigned to various aspects of this work, which can be used by the Executive Committee as they formulate a final recommendation; and
2. An ACCMA representative on the newly formed EMS Redesign Executive Committee.

Please contact me directly regarding these matters. I can be reached by email at [ellevitt@alamedaca.gov](mailto:ellevitt@alamedaca.gov) or by phone at (510) 747-4705. Thank you for your consideration.

Sincerely,

ALAMEDA COUNTY CITY MANAGERS' ASSOCIATION

By its President:

---

Eric J. Levitt, City Manager, City of Alameda and President of the ACCMA
